

ACCESSATHON

10th - 12th of May 2019
the fourth accessibility hackathon @hsrw

What's a hackathon?

It is a work marathon focused on a problem or goal. The Accessathon is about accessibility.

What happens at the Accessathon?

Together, people with and without disabilities develop practical solutions and concepts for a beautiful and accessible life. We use various technologies, but ideas that have little to do with technology are also welcome.

Who can participate?

Everyone who is interested in the topic and wants to contribute their expertise or creativity. Occupation, age, gender etc. are not important. Everyone can contribute something, previous knowledge is not required.

What do I get out of it?

Technology experts are at your side during the development. You can learn a lot in a short time, have fun and make new friends. Imagine, you or someone in your family might benefit from these innovations one day.
